DETAILED ACTION

1. This is in response to the applicant's communication filed on February 12, 2001. Claims 1-43 are currently pending in this application.

Priority

2. It is noted that this application appears to claim subject matter disclosed in prior provisional Application Nos. 60/181,459, 60/181,816, 60,181,741, 60,181,741, 60,179,675 filed February 10, 2000, February 11, 200 and January 19, 2001. A reference to the prior application must be inserted as the first sentence of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e) or 120. See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. Also, the current status of all nonprovisional parent applications referenced should be included.

November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii).

Art Unit: 3629

This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on June 29, 2001 is being considered by the examiner.

Specification

4. The use of the trademark Velcro has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Art Unit: 3629

Claim Objections

5. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 44 has been renumbered to Claim 43.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-43 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

Art Unit: 3629

In the present case, claims 1-43 only recite an abstract idea. The recited steps of communicating guidelines for creative thinking and facilitating creative thinking does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of how to facilitate the conception of one or more inventions. There is no technology in the body of the claim language. In fact, in the claims the applicant states that the display medium comprises a wallboard, a flipchart, a poster board, a whiteboard, a chalkboard, a projection screen, a Velcro board, a textile board and a felt board and wherein the ideas are written on sticky pieces of paper. The applicant also claims writing down ideas and handing the written ideas to a facilitator and having the facilitator display the ideas. The claim language of this application is directed to an invention that is clearly not in the technological arts.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for 7. failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For example, it is unclear how the communicating is performed.

What are the creativity tools used?

What is creative stimuli?

How is the facilitating performed?

How is the conceiving performed?

Art Unit: 3629

How is the ranking of the invention performed?

What is a ladder of abstraction?

How is the training performed?

What is a wish stem?

How are the guidelines generated?

What is IOD? What is multi-voting or categorizing/use multi-voting?

How is the selection criteria determined?

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US 5,662,478) (hereinafter referred to as Smith) in view of Encouraging Creative Thinking.

Smith discloses a method comprising:

a facilitator communicating guidelines for creative thinking to the participants wherein the guidelines comprise creativity tools (col. 4, lines 14-15);

and facilitating a set of steps accomplished by the participants comprising conceiving of and establishing a mess statement (col. 4, lines 62-61).

Smith does not disclose that the method is for facilitating the conception of one or more inventions. However, Encouraging Creative Thinking discloses that the method is for facilitating

Art Unit: 3629

the conception of one or more inventions (page one paragraph 2 – in order to develop innovative products, services or procedures)

Therefore, it would have been obvious to one of ordinary skill in the art to incorporate into the disclosure of Smith the teachings of Encouraging Creative Thinking because in order to develop more innovative products, process and services organizations must encourage their employees to think more creatively.

Encouraging Creative Thinking further discloses interactive brainstorming, writing down ideas to solve the one or more problem statements, reading the ideas, handing the written ideas to a facilitator, and displaying the written ideas via a display medium by the facilitator (page 2 (brainwriting) page 4 – facilitator writes the ideas down on a flip chart).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Creativity in MS/OR discloses creative problem-solving techniques.

Reconsidering brainstorming discloses different brainstorming techniques.
